Yellow Belt Certification Course

Modular course

Main Menu

Module 1: Define Phase

Module 2: Measure Phase

Module 3: Analyse Phase

Module 4: Improve Phase

Module 5: Control Phase

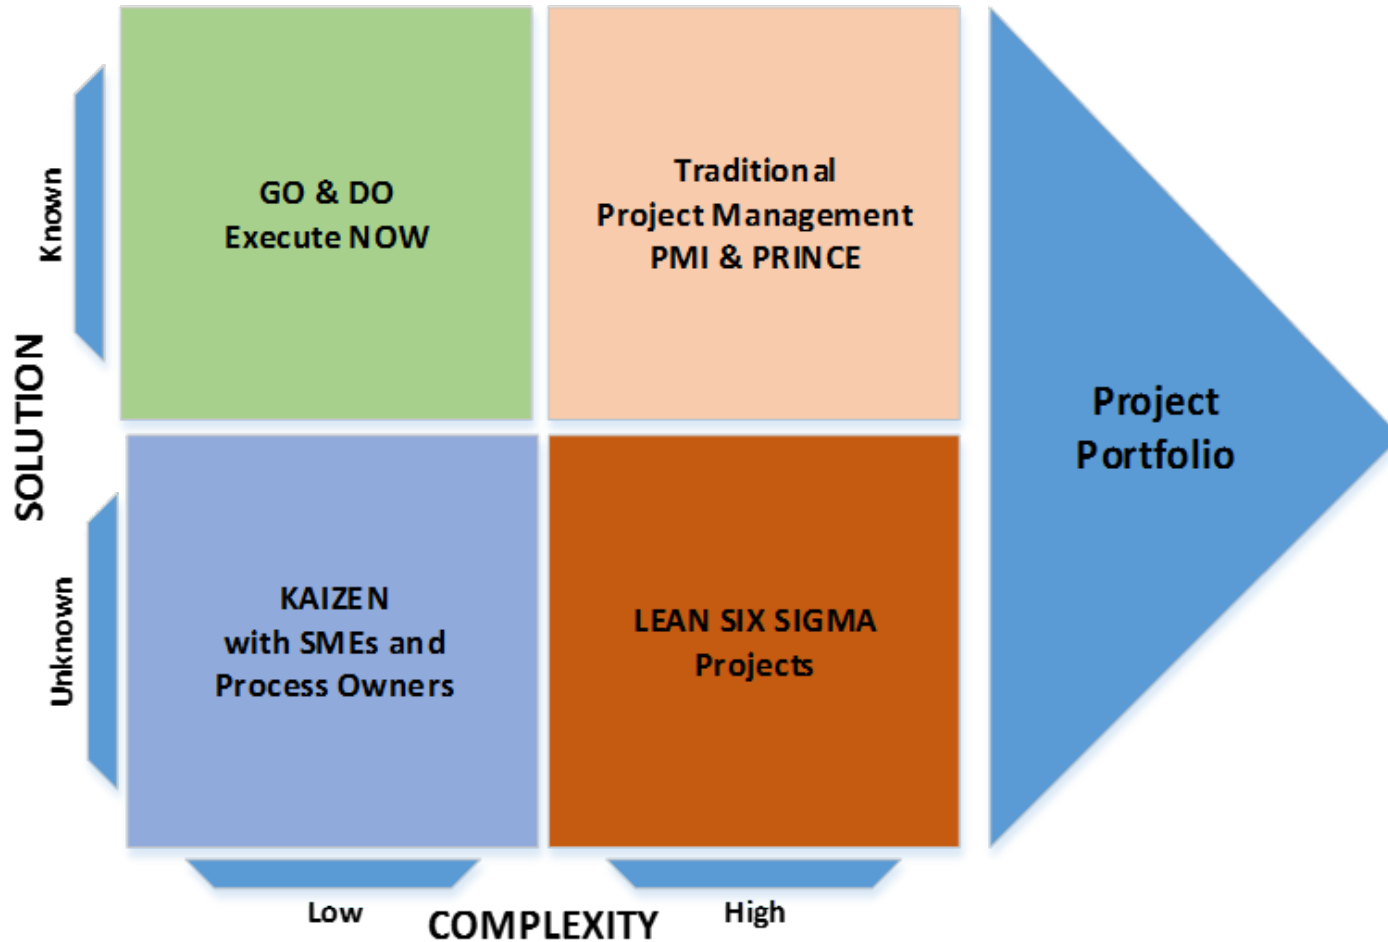

Course Objectives

Let's look at what you will learn:

- 01** This course provides an overview of Lean Six Sigma concepts and the Define-Measure-Analyse-Improve-Control process, along with a group of basic problem solving tools.
- 02** You will acquire a more in-depth understanding of the Lean Philosophy and Six Sigma Methodology.
- 03** You will learn to use the most important tools to be able to complete a Lean Six Sigma project successfully using DMAIC leading to Yellow Belt Certification.
- 04** Build the capability to Analyse process improvement potential.
- 05** Assist in GB or BB process improvement projects
- 06** Acquire the basics or Lean Six Sigma

When do we use Lean Six Sigma?

If we do not **understand the problem**, we will not be able to come up with the right solution.

We need to spend more time on discovering and understanding the problem, finding the correct solution next won't be so hard.
